

## INDEX

	<i>Page</i>		<i>Page</i>
Apparent duplication of type numbers—6AR7-GT	71	6AU5-GT —high perveance beam power amplifier	107
Audio amplifiers, testing with square waves . . . .	94	6AX5-GT —full wave vacuum rectifier . . . .	69
Circuit laboratory report No. 1 . . . . .	23	6CB6 —short cut-off pentode . . . . .	10
No. 2 . . . . .	45	7MP7 —7" cathode ray tube . . . . .	92
No. 3 . . . . .	51	16GP4 —16" kinescope . . . . .	107
No. 4 . . . . .	75	5831 —super-power beam triode . . . . .	72
No. 5 . . . . .	106	5876 —high-mu, "pencil type" triode . . . . .	144
Code practice unit . . . . .	93	5890 —high voltage regulator valve . . . . .	92
Communication receiver design . . . . .	99	Planar electrode valves for v-h-f <b>A1714</b> . . . . .	108
Design of a push-pull amplifier and driver stage . . . . .	127	Playthrough, reduction of . . . . .	106
Discontinued RCA types . . . . .	112	Power supply, grid controlled . . . <b>2050</b> . . . . .	70
Double conversion ten- and eleven-metre superhet . . . . .	63	Pre-amplifier use of grounded plate 6AU6 triode connection . . . . .	45
Electronic keying systems . . . . .	113	Push-pull amplifier and driver stage, design of . . . . .	127
Elements of a TV system Part 1 . . . . .	3	Radio frequencies, international allocation of . . . . .	145
Part 2 . . . . .	36	Radio propagation and the use of antennas . . . . .	82
Part 3 . . . . .	56	Radiotron amplifier A518 . . <b>2x807</b> . . . . .	51
Germanium crystal rectifiers . . . . .	111	Radiotron receiver RC55 . . . . .	23
Grid controlled power supply . . . . .	70	Radiotron reflex receiver RD34 . . . . .	75
Grounded-plate 6AU6 triode connection for pre-amplifier use . . . . .	45	Radiotron 6CB6 in TV receivers . . . . .	116
How the image orthicon works . . . . .	9	Radiotron type <b>KT66</b> . . . . .	28
Intercommunication unit, switchless . . . . .	149	Radiotron type 5675 . . . . .	80
International allocation of radio frequencies . . . . .	145	Radiotron 5763 u-h-f beam power amplifier as frequency multiplier up to 175 Mc/s . . . . .	11
Ionization tubes gauge vacuum pressure . . . . .	150	Radiotron type 5879 . . . . .	122
Low distortion 25 watt amplifier using 807 tetrodes . . . . .	51	Reduction of playthrough . . . . .	106
Low noise Radiotron 5879 sharp-cutoff pentode . . . . .	122	Simple code-practice unit . . . . .	93
Miniature transmitter for 10-metres . . . . .	141	Square waves, testing audio amplifiers with . . . . .	94
Miniature voltage regulators . . . . .	18	Switchless intercommunication unit . . . . .	149
New noise generator diode <del>Part 8 A468</del> . . . . .	14	Television antennas and transmission lines	
New Publications . . . . .	92, 110	Part 1 . . . . .	15
New Radiotron releases —		Part 2 . . . . .	42
2D21 —miniature thyratron . . . . .	66	Part 3 . . . . .	60
6C4/L77 —miniature power triode . . . . .	20	Testing audio amplifiers with square waves . . . . .	94
12AT7 —twin triode amplifier . . . . .	27	Transmitter for 10-metres . . <b>5763</b> . . . . .	141
12AU7 —twin triode amplifier . . . . .	35	Universal coil winding . . . . .	133
12AX7 —high-mu twin triode amplifier . . . . .	48	Use of Radiotron 5763 u-h-f beam amplifier as frequency multiplier up to 175 Mc/s . . . . .	11
A1468 —noise generator diode . . . . .	14	Use of sharp-cutoff miniature pentode Radiotron 6CB6 in TV receivers . . . . .	116
KT66 —power tetrode . . . . .	28	Versatile grid controlled power supply . <b>2050</b> . . . . .	70
QS70/20 —miniature voltage regulator . . . . .	18	Voltage regulators . . . . .	18
QS83/3 —miniature voltage regulator . . . . .	18		
QS95/10 —miniature voltage regulator . . . . .	18		
QS150/15 —miniature voltage regulator . . . . .	18		
New RCA Releases —			
1V2 —high voltage half-wave rectifier	107		
6AS6 —miniature short cutoff pentode . . . . .	69
